

Department of Chemistry Special Play Reading

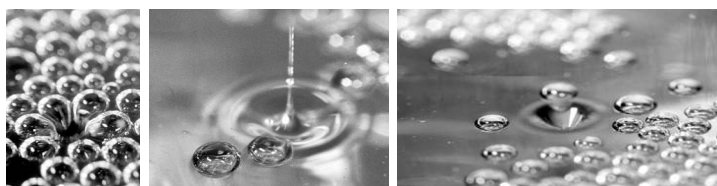

5.00pm 8th May
Wolfson Lecture Theatre
Department of Chemistry

Written and Directed by
Carl Djerassi (Stanford University)

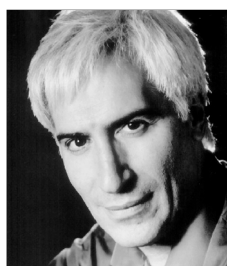

We are pleased to announce a public reading of Djerassi's ninth and most recent drama: a play of academic manners and "fashion in science". It deals with the science of "bubbleology" as applied to champagne and beer bubbles. Can an assistant professor obtain tenure working on such a specialised topic?

$$f \approx \frac{1}{T} \approx \frac{2\Re\theta D_{\perp} \Delta c}{r\lambda(P_0 + 2\gamma/r) \ln[(z_f + 10r)/(z_0 + 10r)]}$$
