R&D EUROPEAN PHD SEMINAR

Would you like to learn more about Research & Development in one of the most successful companies improving the lives of more than 5 billion people around the world every day?

The Procter & Gamble R&D European PhD Seminar provides you with the unique opportunity to experience a typical day of a Scientist or Engineer at P&G. You will get valuable insights into the daily challenges of the competitive and innovative fast moving consumer goods business.

In one of our European Innovation Centers you will have the chance to meet R&D personnel ranging from new hires to top managers and learn about their jobs and scientific research within P&G.

You will experience the innovative world of R&D at P&G by visiting labs and prototyping facilities. During a series of exercises working closely with other international PhD students and P&G R&D employees you will practice the skills required to be successful in industry.

The seminar is open to Science or Engineering PhD students who are in the penultimate or final year of their PhD studies. Ideally, the graduation will be by December 2017 or later.

Oral-B

"The most valuable aspect of the PhD seminar was to get a glimpse into the culture and people of P&G. The diversity of people and the possibility to learn and grow in interdisciplinary industrial projects really motivated me to work in R&D at P&G. Interesting case studies and the enthusiasm of instructors and other participants made the seminar truly a great experience!"

Otto Virtanen
PhD Seminar Brussels/Belgium

"The PhD seminar was an amazing experience and is absolutely recommendable. During the interactive workshops I could discover unknown strengths and could learn which roles and positions would fit the best to me. Especially, the people running and attending the seminar were very passionate, giving me a good feeling on working atmosphere at P&G. For me, this really made the difference and strengthened my decision to join P&G."

Maria Janzer
PhD Seminar German Innovation Center

"The PhD seminar provides a fantastic insight into the diverse roles inside R&D. Coming straight from academia this seminar gave me the opportunity to see how my knowledge and skills would apply to a real business environment. I learnt about rigorous scientific approaches and how to innovate. The people I met in the seminar were really inspiring and enthusiastic, which reinforced my desire to join the R&D community in P&G."
