

Part III Chemistry 2021-22

Start of term arrangements

Wednesday 6th October – Safety Talk & Introduction to Part III Chemistry

BMS lecture theatre at 16:00. Safety Talk & Introduction to the Part III Chemistry course. *The Head of Department requires all Part III students, without exception, to attend this talk.*

- Welcome from HoD (Dr James Keeler)
- Project Safety Talk from Dept. Safety officer (Dr Richard Turner)
- Introduction to the Part III course (Dr Bill Nolan)
- Part III projects
- Plans for assessment

Lectures

We are planning for the Part III lectures to be given **in person**.

The Part III courses will be given in the **Wolfson** or **Pfizer** lecture theatres depending on the numbers attending.

Printed lecture handouts will be available at the start of each lecture course and all Part III lectures are recorded, the **recordings** will be available on Moodle a day or so after each lecture.

Supervisions

Arrangements for supervisions will be similar to those in Part II with the lecturer requesting email sign-up after the first or second lecture.

In person supervisions may be held in the following locations within the Department:

- Staff offices
- Cybercafé after 16:00
- Library after 15:00
- The balcony area above the BMS foyer

All spaces used for supervisions and other small group teaching must be subject to a risk assessment.

Assessment

Will be by means of **3 hour, in person, closed-book invigilated examinations** held in the Department of Chemistry (same as Part II). For those students unable to take in person exams then the assessment will be as above but using online invigilation.

Provisional dates for the Part III exams are during the week commencing **Monday 30th May 2022**
